

# Advisory – Product Delivery Interruption UPDATE

Product Group: Vishay Siliconix/ March 25, 2019

**SUBJECT:** *Potential Delivery Interruption for selected SOT-23 Power Mosfets due to fire at KEC Lamphun factory*

Dear Valued Customer:

This advisory is being provided to you as an announcement that due to the fire at KEC Lamphun (Thailand) factory on February 24, 2019, we are expecting interruption in deliveries for the below SOT23 part types.

According to KEC official announcement, it might take up to 6 months before they can go back to normal production in their factory. During that time, we expect interruption in the deliveries for these devices and we encourage our customers to convert the orders to the recommended parts to minimize the impact of the delivery issues. If the customer is unable to accept the -GE3 version of the product, we need to be informed.

Impacted part number	Recommended Part Number
2N7002E-T1-E3	2N7002E-T1-GE3
2N7002-T1-E3	2N7002-T1-GE3
2N7002K-T1-E3	2N7002K-T1-GE3
TP0610K-T1-E3	TP0610K-T1-GE3

The recommended parts are identical in electrical specification and package dimensions to the impacted part types. The only difference is that the –E3 parts are lead-free mold compound and the –GE3 parts are lead-free/halogen-free mold compound.

We are preparing additional quantities of the -GE3 version to support any order conversion.

Please do not hesitate to contact us if you have any questions or need further information.

Sincerely,

Amit Gole
